FLIPBOX SOFTWARE SUITE

Flipbox Software Suite is the powerful software to enhance group collaboration through the use of interactive display. Install Flipbox Software Suite on Windows 7 or 8 powered PC connected to any touchscreen or interactive whiteboard and you will get a full-featured set of presentation and collaboration tools to make group work more effective and most productive.

With Flipbox Software Suite you can sketch, present documents, browse the Internet, wirelessly display laptop or tablet screen, set-up videoconferencing - basically, everything needed to impress your audience and increase your team's productivity!

Many software solutions for interactive displays and whiteboards that are on the market today were designed for elementary education purposes and do not entirely correspond to the needs of modern businesses and higher education establishments. That is the reason why a majority of existing interactive display and whiteboard solutions have just basic utilities and capabilities. Flipbox Software Suite can bring this expensive hardware back to life. And once you have PC and touchscreen you don't have to buy any additional hardware – simply install Flipbox.

WHAT CAN YOU DO WITH FLIPBOX?

DRAWING

Flipbox can be used as a substitute for a usual marker whiteboard or a flip chart. You can write with digital ink, print records, save them to flash drives and send by e-mail.

FILE AND WEB BROWSERS

Presenting has never been so easy - simply connect a USB flash drive and select a file you want to show. Flipbox supports displaying still images, video and popular office formats such as MS Office and PDF.
You can use gestures to scroll and scale displayed document. Drawing and saving tools are available as well.

SCREEN MIRRORING FOR NOTEBOOKS AND TABLETS

Flipbox is perfect for BYOD collaboration. You can display notebook desktop on Flipbox without connecting any wires. The image is transmitted through WiFi. You can annotate over the mirrored screen and control the notebook directly from Flipbox. Apple Airplay Mirroring support is also available for displaying desktop of Apple iPad or iPhone.

VIDEOCONFERENCING

Flipbox Suite supports cloud-based software videoconferencing powered by TrueConf. It can natively connect to another Flipbox or to any endpoint or multipoint server that supports H.323 or SIP protocols (e.g. LifeSize Room, Cisco Tandberg Edge, Polycom HDX, etc.) - option. Compatibility mode now allows running Skype, Microsoft Lync, Cisco Webex and other video collaboration tools.

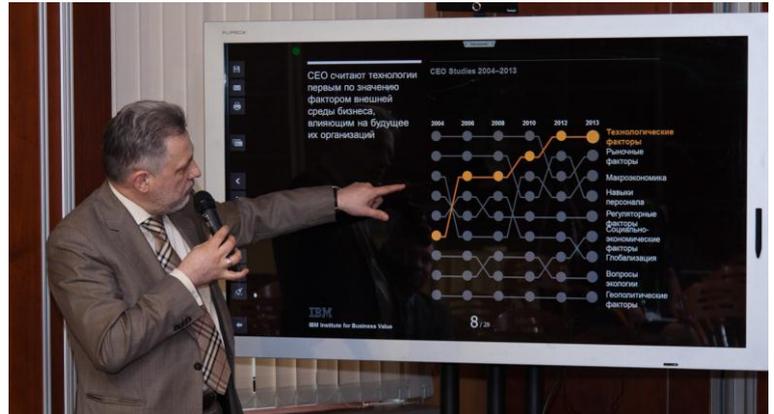

WINDOWS 8.1 COMPATIBLE

Administrator can preinstall Windows applications on Flipbox (like Skype or Microsoft Lync). Then you can easily start these applications from Flipbox user interface. Applications will run in the sandbox, so, it is perfectly safe, convenient and efficient way to work with your applications in a meeting room.

WHERE CAN YOU USE FLIPBOX SUITE?

IN BUSINESS

Flipbox Suite is perfect for meeting rooms and conference halls. With Flipbox it is easy to engage your audience, capture notes and discuss ideas.
Each participant of the meeting can bring image from his own device (laptop or iPad) to the big screen in seconds – and that truly facilitates the collaboration.

IN EDUCATION

A lot of school and higher education teachers and business trainers prefer Flipbox Suite to conventional whiteboard software.
Flipbox also enables teachers to use such modern technologies like BYOD and videoconferencing in process of education.

IN HEALTHCARE

The demand for collaboration tools is very high in healthcare. And Flipbox Suite provides all necessary tools to support effective communications. That is extremely useful for doctors and healthcare officials.
Doctors can use Flipbox tools side-by-side with special healthcare software, annotate on top of it and share notes across their colleagues by e-mail, USB drive and networked printer.
