Applications

PUBLIC PLACES
Making life easy

Worldwide, the concept of the public space including stadiums, community centers and transportation hubs; like airport, Metro station is being redefined as a one stop shop, encompassing within one roof the facilities of transport, entertainment, hospitality, merchandising and more.

Wavex Interactive Displays are designed to make a visitor’s experience and navigation of these public places easier and faster through touch interactive kiosks, which deliver all information at the touch of a finger.

Application: Way Finding Kiosks, Digital Signage, and Information Kiosks

RETAIL
Information at your fingertips

Retail spaces, especially in the case of big multi layered malls, resemble a maze and can be a challenge to navigate both within the malls and in retail stores in these malls.

Wavex Interactive touch displays are used in stores for product information like availability, size and color and product demonstration videos.

Wavex Interactive touch display can be placed strategically in retail spaces with information on stores and interactive maps and guides, to help the customers navigate the floors or aisles and locate the store or item of their choice. The interactive touch displays can be used for digital signage too.

Application: Digital Signage, Way finding Kiosks, Information Kiosks

EDUCATION
The doors of discovery

Enjoyable and active learning is the basis for successful educational programs at all levels.

Wavex interactive displays help teachers from K12 to universities to engage students, who are used to touch screens in their personal spaces. Several studies have shown that learning is faster when using touch screen. The teachers can use Wavex display to design lessons, which will help students to participate in lessons and enhance the learning process through “active learning”. The touch interactive displays are a boon for challenged students with the help of specialized software.

Application: Classrooms, library, Way finding, digital signage / Board

CORPORATE
Consolidating networks

The world of business is rapidly becoming nucleated around the core capabilities of its people. The fast pace of corporate sector worldwide now demands for greater efficiency, productivity and quick problem solving. This calls for a seamless exchange of ideas through brainstorming sessions, meetings, presentations and skill enhancements through collaborations on a real time basis.

Wavex interactive touch displays are designed to facilitate these activities by providing interfaces for processes that are integral to the success of growth-oriented organizations.

Application: Meeting room, Board Room, Collaboration rooms, Way finding, Digital Board / Signage

WavexTouch is also suitable for other industries like; Hospitality, Aviation, Military, Healthcare, Broadcast and many others.

Engagement is a critical element of “active learning” and Interactivity is the best form of engagement. Interactive learning is an approach which incorporates ‘social connect’ in the learning process, an important aspect of Active learning.

Multiple studies have shown that students learn faster and retain more when they are active participants in the learning process. Interactive technology is enabling “active learning” and is now an integral part of education.

Wavex Interactive touch displays encourage Active learning through its unique and best in class benefits. They are available in 32”, 42”, 46”, 55”, 70” and 84”.

Features

Auto Signal Detection Technology (ASDT) for Green Technology
Wavex LED interactive touch display saves electricity as it switches on or off automatically by sensing signal input to the display. This feature makes them the best in class green technology product.

Plug and Play for ease of use
Wavex interactive touch displays are HD compliant and work with any platform: PC, Mac, Android and iOS.

Touch interactive on Demand
With touch of a button on remote control, presenter can control when he wants the screen to be touch enabled and when not.

EZ Port for Second Teacher / Presenter
EZ port situated on the side of Wavex interactive touch display allows an easy access to the ports so that a second teacher or presenter can easily get connected to the display and ready to share.

Freeze Image
Presenter can use Freeze Image function to toggle between lessons and files to select for sharing without participants seeing the content. A mandatory function required by every presenter to this day of collaboration.

Multi touch enables Active Learning
The 10-point multi touch in Wavex interactive touch displays are precise and enhance collaboration and therefore Active learning.

Softwares Suites*
Enhance Wavex interactive touch displays capabilities

Education:
Empower teachers through easiteach; next generation software for digital boards. Easiteach helps to create and deliver interactive & engaging lessons using Wavex Interactive touch displays for “active learning” in schools both primary and secondary.

Easiteach offers:
- Multi platform software adds variety to any interactive display.
- Dual function software for the next generation classroom.
- Zipper menu for easy content sharing.
- Multi-touch works seamlessly with Wavex Interactive touch displays.
- Record sound and video for archiving for playback.
- Touch-to-speech capabilities for ease of use.
- Handwriting and Shape Recognition for ease of understanding.
- Easy-accessible tools for importing lessons.
- Language and numerical tools for content pack for lesson creation

Easiteach is developing software for education have ongoing development process and are adding and updating features all the time.

Corporate:
Super Power to Wavex interactive display thru Flipbox Software suite (Optional). The most important aspect of any “active learning” is collaboration and BYOD is fueling collaboration.

FLIPBOX software suite, enhances the experience of “active learning” by:
- BYOD with Mirroring of iOS and Android Devices for stakeholders to connect to “shared screen” immediately.
- Digital white board for brainstorming.

- Internet browsing on demand.
- Videoconferencing for collaboration.

FLIPBOX connected to a Wavex interactive touch display, helps impress stakeholders, students, teams, and everyone in between.

Highlights

Ultra Durable product
50,000 hours of life with the use of commercial panel and metal chassis makes Wavex interactive touch display one of the most durable displays in the market.

Ambient Light Sensor (ALS) for long Life
ALS enhances the life of the interactive touch displays, as it helps the display to adjust its brightness based on the ambient light of the room. This also helps the viewer as they do not strain their eyes while watching the display.

HDMI 3 IN

Freeze Image
Presenter can use Freeze Image function to toggle between lessons and files to select for sharing without participants seeing the content. A mandatory function required by every presenter to this day of collaboration.
