

## WT-CONTROL ROOM SOLUTION

The frame structure is made of high quality cold-rolled steel plate. The front and rear revolving doors can be made of high quality cold-rolled steel plate or wood. The high quality density board on the desktop is pasted with high pressure refractory plate.

- According to the requirements of the matching control system to achieve sound and light, lifting and other synchronous alarm cooperation, powerful installed space in the cabinet, with the lifting of the wiring chain, encircling multi-screen display bracket, perfect peripheral supporting, to meet your personalized needs.
- Dc silent lifting column, using hall induction to ensure the synchronous control of multiple lifting columns, standard anti-pinch function design, can achieve resistance back, ensure safe use
- Can support a variety of mobile terminal lifting scheme design, can change the layout, multipoint location memory function, easy to control the working state, relieve your work fatigue.

**FUNCTION**

**HEIGHT ADJUSTMENT**

Electric elevations are ergonomically designed to keep you active, healthy, and productive at work. When needed, shift between sitting and standing to create a desk that is comfortable to work in.

**EQUIPMENT VENTILATION MANAGEMENT**

The ventilation airflow is arranged to enter from the bottom of the console. After the internal natural circulation, loose air holes are designed on the front and rear door panels on the upper part of the bottom cabinet according to the exchange principle of airflow, so as to achieve a good cooling effect. When the heating is large, axial flow silent fans can be added as required to ensure the cooling requirements of the equipment.

### SLIDING KEYBOARD TRAY

High strength quiet guide rail is adopted to ensure free pull and push. Soft foam is adopted for the hand pillow, which can effectively relieve working fatigue. The surface texture of imitation leather improves the product grade

MEETING TABLE WITHOUT BOTTOM CABINET

Tech. info.:

- Metal base/Frame and legs . •Worktop/worksurface:25mm thick laminated finish with Polyurethane edging
- Metal base(under the doors) with ventilation hole Cut-out for 3x desktop socket
- With wire management system (cable tray)for power and data

## PACKAGING AND INSTALLATION

### 1. Packaging

- Packing in environmentally-friendly wooden case, export grade, strong and recyclable

### 2. Installation

- Modular design, easy to install, and provides detailed installation drawings and online instructions

### 3. Warranty

- Main frame-10 years
- Worktop- 3 years
- Other optional parts 1-3 years, subject to the official statement of our company
